CLOUD & HOSTING

Your resources. Ready when you are.

Flexible computing. Connected business.

Cloud computing helps reduce the capital costs of server equipment and software. Access shared computing resources from a variety of devices, when your business needs them.

Virtual servers

Reduce capital costs and improve access to computing resources.

Hosting & co-location

Purpose-built facilities to support your online business.

Backup & recovery

Support the availability and continuity of your business information.

Built for access. Supported for continuity.

COPIERS & PRINTERS

A smarter way to manage every document.

Tailored printing. Reliable performance.

Innovation Hub Group provides multifunction printing and document management solutions designed around your business. Our multi-brand approach helps match the right equipment to your needs and budget.

Business-fit equipment

Multifunction devices selected for your working environment.

Cost-conscious processes

Tailored solutions focused on efficiency and continuous optimisation.

Quality consumables

Cartridges and toners supplied for major brands.

Focus on your work. We'll handle the print.

The foundation of a connected business.

Every business has different IT requirements. Innovation Hub Group designs resilient infrastructure and networks around your people, locations and operational needs.

01

LAN & WAN

Local and national networks for a single office or multiple branches.

02

WIRED & WIRELESS

A choice of connectivity designed to suit your environment.

03

FIBRE & Wi-Fi

Modern network technologies supported by experienced specialists.

Built around your business

From a smaller local network to a larger multi-site environment, our solutions combine practical design with dependable support.

12

MANAGED
SUPPORT &
SECURITY

Technology cared for. Business protected.

Practical support for the systems you depend on.

Let our engineers manage your technology so your team can focus on the business. Our services combine ongoing maintenance, remote assistance and risk assessment.

IT MANAGEMENT & MAINTENANCE

Support for your IT environment, network availability and day-to-day technology needs.

REMOTE DIAGNOSTICS

Remote assistance, monitoring and automation to resolve issues and improve reliability.

IT RISK ASSESSMENTS

Assess firewall and endpoint protection, and strengthen systems against malicious software and evolving threats.

CCTV MAINTENANCE & SUPPORT

Preventative maintenance that helps keep surveillance systems working when recordings matter most.
